

Saprae Creek Estates

Rural water and sewer servicing construction

The RMWB has awarded the “Rural Servicing Saprae Creek Estates Contract 1” contract to H Wilson Industries (2010) Ltd. Work on site is expected to start on approximately October 16, 2017. Before then, there will be personnel on site periodically to prepare the site.

Saprae Creek Contract 1 includes the deep utilities and surface/road works throughout the community. The deep utilities include the water mains, sanitary sewer and services to property line. The surface works include the cement stabilized base, road gravel, road paving, driveway restoration to edge of road right of way, drainage improvements, culverts, and landscape restoration with hydro seeding.

Works taking place during the winter of 2017 and spring 2018 include water and sewer mainlines which will be installed by directional drill, minimizing the disruption over the winter. During this period residents that will be directly affected by the construction will receive further notices as required.

During the 2018 and 2019 construction seasons, portions of the roadways will be restricted to single lane traffic, and roads that have access from two directions may be closed to through traffic for limited sections. At times access to driveways may be restricted during the day with access restored to driveways during non-work hours. If vehicle access to driveways is restricted during non-work hours vehicle parking will be made available on the roadway in the vicinity of the affected home.

It is H Wilson’s intent to minimize disruptions to residents as much as possible during construction and they will be working with residents whenever possible to facilitate access to properties.
