

# Gregoire Lake Estates

## Construction Starting

The RMWB has awarded the “Rural Servicing Gregoire Lake Estates Contract 1” contract to Knelsen Sand and Gravel Ltd. Work on site is expected to start on approximately July 4<sup>th</sup>. Before then, there will be personnel on site periodically to prepare the site.

Gregoire Lake Estates Contract 1 includes the deep utilities and surface/road works throughout the community. The deep utilities include the water mains, sanitary sewer, storm sewer and services to edge of road right of way. The surface works include the concrete curb, gutter and sidewalk, road paving, driveway restoration to edge of road right of way and landscape restoration with grass turf.

During construction portions of the roadways will be restricted to single lane traffic and roads that have access from two directions may be closed to through traffic for limited sections. At times access to driveways may be restricted during the day with access restored to most driveways during non-work hours. If vehicle access to driveways is restricted during non-work hours vehicle parking will be made available on the roadway in the vicinity of the affected home.

The Contractor will make efforts to minimize disruptions, however Gregoire Lake Estates has narrow road rights of way with limited room to work, so some disruption is unavoidable.
