The Path Forward

Today, the Cabinet Covid-19 Committee met to discuss moving into Step 3 of the Path Forward. From the beginning, Step 3 could only be considered if hospitalizations cases were under 300 and declining. At this time, hospitalizations are below 300, but they have been climbing in recent days. **We will not be moving into Step 3 today.** No exact timeline was given on when it would be reconsidered.

Minister Shandro stated that vaccinations are the path out of the pandemic, but they didn't start arriving from the federal government in large enough amounts fast enough. Over 46% of those hospitalized are under age 65, and 88% of those in ICU. We have also seen increases in active and new daily cases, and positivity rates are increasing.

Variants of Concern now account for 16% of active cases, up from 10% just a couple weeks ago.

This week Alberta is in the final stages of vaccination of Phase 2A. Minister Shandro said Phase 2B should be starting very soon.

COVID-19 UPDATE

Under the Provincial Restrictions, [Masks are mandatory in any indoor public space.](#)

Vaccine Updates – Sign up [here.](#)

Vaccination Progress as of March 21:

487,493 doses of vaccine have been administered in Alberta.
27,637 (178 were 2nd doses) in the last 24 hours.
93,414 Albertans have received both doses and are fully immunized.
 Rate of vaccination is **11,024.5** doses per 100,000 population.
182 adverse events following immunization have been reported.

Second Dose: Emerging evidence shows first doses of the vaccine are at least 80% effective at preventing severe illness. Second doses are necessary to ensure you're protected for as long as possible. Starting March 10, second doses will be administered up to 4 months later so all Albertans over 18 are protected with the first dose faster. This change is in line with British Columbia and other jurisdictions.

Vaccine Roll Out News

Now Booking:

Pharmacies:

- Phase 1: Born 1946 or earlier
 - Phase 2A: Born 1947-56, FNMI born 1962-71
- *Available at participating pharmacies. No walk-ins.

Online Booking:

- Phase 1: Born 1946 or earlier
- Phase 2A: Born 1947-56, FNMI 1962-71

Call Health Link 811:

- By birth year, one year added each day:
- Phase 1: Born 1946 or earlier
 - Phase 2A: Born 1947-56, FNMI born 1962-71

*FNMI – First Nations, Métis, Inuit

COVID-19 UPDATE

Under the Provincial Restrictions, [Masks are mandatory in any indoor public space.](#)

Vaccination Program

Early Phase 1 (December 2020): Complete

- Health-care workers in intensive care units
- Respiratory therapists
- Staff in long term care and designated supportive living facilities

Phase 1A (January to March 2021):

- Vaccinations are being offered to key populations across the province:
- Respiratory therapists
- Health-care workers in intensive care units, emergency departments, COVID-19 units, medical and surgical units, and operating rooms
- Paramedics and emergency medical responders
- Staff in long term care and designated supportive living facilities
- Home care workers
- All residents of long-term care and designated supportive living, regardless of age
- First Nations, Métis and persons 65 years of age and over living in a First Nations community or Métis Settlement
- Seniors 75 years of age and over, no matter where they live.

Phase 2: April to September 2021:

Phase 2: Group A (Booking begins March 15 by year of birth)

- Albertans aged 65 to 74, no matter where they live
- First Nations, Inuit and Métis people aged 50 and older no matter where they live

Phase 2: AstraZeneca (Limited Supply Remaining)

The following groups are eligible to receive the AstraZeneca vaccine early, while supply lasts:

- Albertans born 1957 to 1971 (turning 50 to 64)
- First Nations, Métis and Inuit (FNMI) persons born 1972 to 1986 (turning 35 to 49)

How to book:

The following birth years can call 811 to book appointments for the remaining doses:

- Born 1957-61
- FNMI born 1972-76

AstraZeneca cannot be booked online or in pharmacies at this time.

Not Yet Eligible: Phase 2 is broken into 4 groups. Vaccinations for Group B will begin once Group A has been completed. Timelines are subject to change depending on supply. Details on how to get the vaccine will be released prior to each group.

Phase 2: Group B (UPDATED March 15)

• Albertans born 2005 to 1957 (16 to 64) with any one of the following high-risk underlying health conditions:

- Asplenia or dysfunction of the spleen (a missing spleen or a spleen that is no longer working)
- Cancer (anyone with a new diagnosis of or treatment for all forms of cancer in the last year, except non-invasive skin cancer)
- Chronic heart disease and vascular disease:
 - Including: congenital heart disease, chronic heart failure, heart or kidney disease from high blood pressure, and a history of a stroke
 - Not including: high blood pressure alone
- Chronic kidney diseases requiring regular medical monitoring or treatment
- Chronic Liver disease due to any cause (for example: cirrhosis, chronic hepatitis, and hemochromatosis)
- Chronic neurological disease (for example: epilepsy, Parkinson's disease, MS, muscular dystrophy and dementia)
- Chronic respiratory (lung) diseases:
 - Including: COPD, cystic fibrosis, pulmonary hypertension, and severe asthma that required an asthma-related emergency department visit or hospital admission in the past year
 - Not including: mild or well-controlled asthma
- Diabetes requiring insulin or other anti-diabetic medication to control
- Immunosuppression: a weakened immune response due to disease or treatment, including:
 - anyone undergoing chemotherapy or treatment for HIV, genetic disorders of the immune system
 - people receiving long-term medical treatment to control severe inflammation such as rheumatoid arthritis or systemic lupus
- Pregnancy: anyone who is currently pregnant
- Severe mental illness or substance use disorder requiring a hospital stay during the past year (for example: schizophrenia, depression, anxiety disorders and others)
- Severe obesity: a Body Mass Index of 40 kg/m² or more
- Severe or profound learning disabilities or severe developmental delay:
 - Including: individuals with Down syndrome, fetal alcohol syndrome, cerebral palsy, autism spectrum disorder and others
 - Not including: Attention Deficit Hyperactivity Disorder (ADHD)
- Solid organ, bone marrow or stem cell transplant recipients

[Detailed clinical breakdown of these conditions and who is eligible](#)

Confirming eligibility

- A doctor's or pharmacist's note is not required to get the vaccine. However, you may want to talk to your doctor or pharmacist to help you understand if your condition is on this list
