<b>B.1.617 (India)/Delta 2</b>	<b>721</b>
<b>P.1 (Brazil)</b>	<b>721</b>
<b>Total:</b>	<b>6796</b>

<b>AHS NZ Recovered:</b>	<b>6425</b>
<b>AHS NZ Deceased:</b>	<b>33</b>
<b>AHZ NZ Active:</b>	<b>338</b>

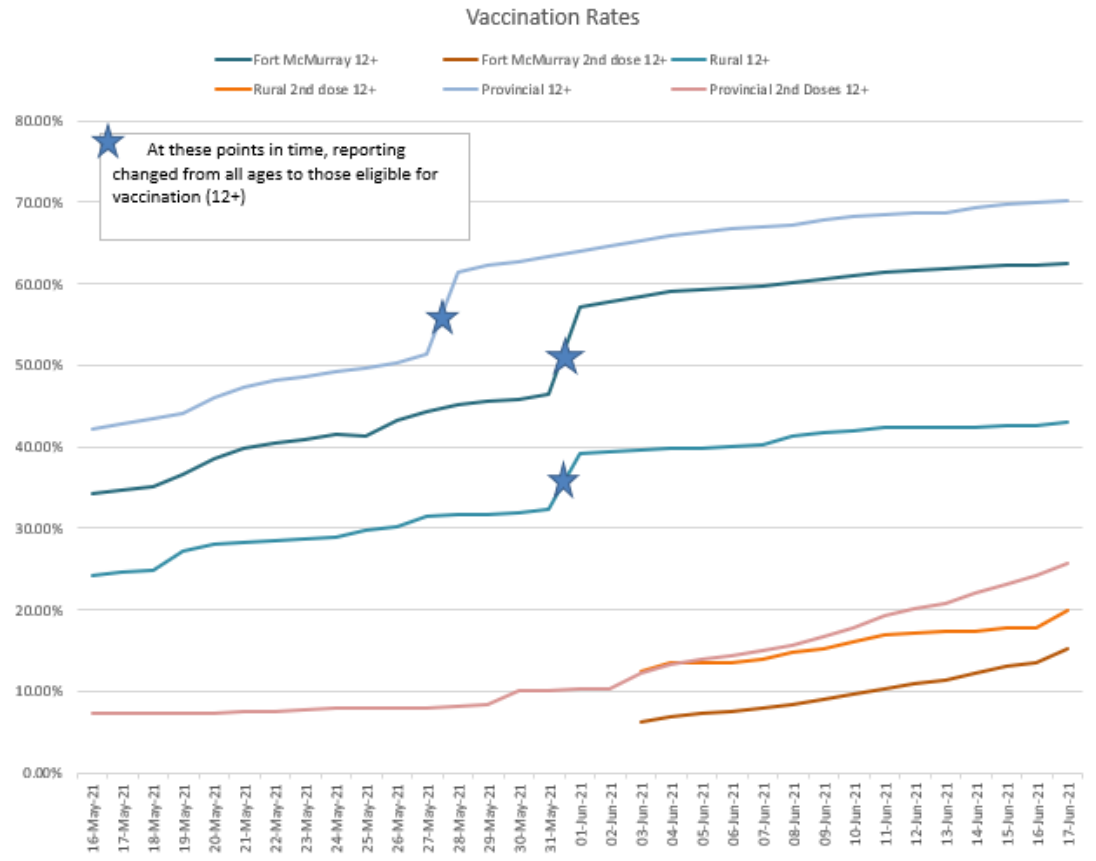

# COVID-19 UPDATE

## New vaccination information:

First Dose	Book
March	Now
April	Now
May	June 28

Where possible, AHS and participating pharmacies who administered your first dose will contact you when you are eligible for your second dose. You do not need to wait to be contacted to book an appointment once you are eligible and you can choose where to go to get your second dose.

[More information on Vaccinations can be found here.](#)

## Second Dose:

Every Albertan should get their second dose when they're eligible. A single dose of COVID-19 vaccine offers at least 73% protection against severe outcomes, including hospitalization and death. However, second doses are needed to get the best and most long-lasting protection.

The following information was presented regarding 2<sup>nd</sup> doses.

- Alberta will have sufficient supply of each vaccine to provide 2<sup>nd</sup> doses
- Anyone who received 1<sup>st</sup> dose of AstraZeneca in April or later can book second dose (either AstraZeneca or mRNA) at least 8 weeks after the 1<sup>st</sup> dose.
- Fact Sheet for Albertans who got AstraZeneca for first dose available [here](#).
- Quarantine rules have changed for people who are fully immunized:
  - People with 2 doses no longer need to quarantine if they are exposed to someone with Covid-19 if they have no symptoms.
  - People with 1<sup>st</sup> dose have shorter quarantine requirements

## Vaccine Efficacy:

Vaccine	After 1 <sup>st</sup> Dose	After 2 <sup>nd</sup> Dose
Moderna	82%	93%
Pfizer	73%	90%
B.1.1.7 UK Variant	73%	91%
P.1 Brazilian Variant	75%	89%
B.1.617.2 Delta Variant	33%	88%

Vaccines help prevent you from getting infected and protect you from getting severely sick if you do get it. [All vaccines are safe, effective and save lives.](#)
