REGIONAL MUNICIPALITY
OF WOOD BUFFALO

Fort Chipewyan Water Treatment Plant Update

July 18, 2024

Dear community leadership,

Regular water use can resume in the hamlet of Fort Chipewyan. The maintenance work at the Municipal water treatment plant is now complete.

Thank you for helping share the previous notice and conserve water over the past seven days.

Municipal Water Truck Fill Reopened

The Municipal water truck fill station has reopened and is available for regular use. We would like to recognize and thank Mikisew Cree First Nation for providing water to users of the Municipal truck fill station during the temporary closure.

Water Treatment Plant Updates

The water being produced at the Fort Chipewyan Water Treatment Plant and in the distribution system continues to meet all Canadian Drinking Water Guidelines. Water quality is very closely monitored and tested, and we will continue to share monthly reports.

All Fort Chipewyan Water Treatment Plant updates and monthly reports are also available online at rmwb.ca/waterupdate

If anyone has questions or requires more information, they may contact Pulse at 780-743-7000 or visit the Municipal Office in Fort Chipewyan.
