Risk Matrix

The Disaster Risk Matrix below represents the likelihood and severity of the hazards identified in the Regional Municipality of Wood Buffalo (RMWB). The arrows represent the potential influence of climate change on the risk/hazard event's likelihood.

 REGIONAL MUNICIPALITY OF WOOD BUFFALO			2020 RMWB Disaster Risk Matrix					Effective October 1, 2020				
Risk Treatment Considerations												
	Extreme Risk		Eliminate/Immediate Risk Treatment. These are extreme risks, unacceptably high, driven by relatively high likelihood and consequences. Immediate risk treatment required. Monitor rigorously.									
	High Risk		Mitigate. These are high risks and warrant management action to reduce the likelihood or consequence of the risk. High priority risk treatment required. Monitor closely.									
	Moderate Risk		Accept or Mitigate to ALARP (as low as reasonably practicable). These are moderate risks and may be relatively well understood and managed through the application of control measures or counter measures. Some risk treatment required to reduce to lower levels. May develop mitigation controls and/or contingency plans.									
	Low Risk		Accept. Low risks are common place and should be monitored and accepted. Additional risk treatment not likely required.									
	Very Low Risk		Accept. Risk events do not require further consideration.									
Likelihood Ranking <i>Likelihood Ranking Score</i>			Very Low 1		Low 2		Moderate 3		High 4		Very High 5	
Likelihood Description			May only occur in exceptional circumstances. Has occurred in last 20 years		May occur and has occurred in last 10 years		Has occurred once within last 5 years		Has occurred twice in last 5 years		Has occurred 3 or more times in last 5 years	
Severity	Catastrophic	5	10+ Fatalities > 100 Displaced Major infrastructure damages Long-term economic, social, and environmental impact		Tailings Dam Dyke Failure →							
	Major	4	5 - 10 Fatalities 25 - 50 Displaced Major infrastructure damages Short-term & widespread economic, social, and environmental impact		Significant MVA Pandemic Influenza →		Major Pipeline Release		Ice Jam Flooding ?		WUI Wildfire →	
	Moderate	3	<5 Fatalities >10 Injured 10 - 25 Displaced Widespread infrastructure damages Long-term and localized economic, social, and environmental impact				Terrorist Attack Industrial Explosion		DG Release Fort Chip Access → Water Availability → Train Derailment Aviation Accident		Slope Instability →	
	Minor	2	0 Fatalities <10 Injured 5 - 10 Displaced Minor infrastructure damages Short-term and localized economic, social, and environmental impact		Labour Disruption		Utilities Disruption Critical Infrastructure → Failure		Severe Winter Storm → H2S Release Major Structural Fire		Severe Summer Storm → Air Contamination	
	Insignificant	1	0 Fatalities <5 Displaced Minor infrastructure damages Minor economic, social, and environmental impact									

Community Hazards

The table below illustrates the top 3 community specific hazards based the 2020 Disaster Risk Matrix. The colour coding represents the risk/hazard event from Extreme Risk to Very Low risk.

Top 3 Hazards

Risk/Hazard Event	Severity	Likelihood	Climate Change Influence on Likelihood
Wildfire	Major	High	Increasing
Major Pipeline Release	Major	Low	N/A
Dangerous Goods Release	Moderate	Moderate	N/A

Early Notification

It is critical to disseminate emergency information to residents. When possible, after the risk assessment, early notification should be given to identified vulnerable sectors allowing vulnerable populations the extra time needed to evacuate – i.e. during an evacuation alert through the Alertable app. Download the Alertable app to receive critical emergency alerts for your community.

Community Identified Communications

It is critical to disseminate emergency information to residents. The following table illustrates the best to least useful communication method identified by the community of Sapræ Creek Estates:

BEST  LEAST USEFUL	<u>Alberta Emergency Alert</u>
	<u>Facebook</u> • “Sapræ Creek Residents Society” (Closed Group) *Information shall be shared onto community Facebook accounts from RMWB’s social media post*.
	<u>Emergency Vehicle & Door-to-Door</u>

Alberta Emergency Alert

Vulnerable Persons Registry Plan

Vulnerable Persons Registry	Persons that qualify as vulnerable persons encompasses people who experience severe difficulty with: • Mobility, vision or hearing. • Developmental/intellectual, cognitive, or mental health. • Residents who require electricity for life-sustaining equipment such as life support, oxygen, dialysis, etc. For more detail on Vulnerable Persons Registry (VPR) visit Vulnerable Persons Registry - Regional Municipality of Wood Buffalo (rmwb.ca) and/or contact the RMWB VPR Coordinator through PULSE at 780-743-7000.
Procedures	1. VPR Coordinator communicates to the VPR registrant that they are being evacuated by an emergency responder. 2. If evacuation is required out of the community, VPR registrant will be taken to the designated location (Accommodation Centre) for further transportation out. 3. Upon arriving in Fort McMurray, they will be transported to the Northern Lights Hospital or the designated Accommodation Facility, depending on the situation (if applicable). 4. VPR Coordinator confirms that the VPR registrant has been safely evacuated and accommodated.
Evacuation	In the event an evacuation ordered is issued by local authorities, the RMWB has identified the needed resources for a bus assisted evacuation. Specific resources will be allocated based on the unique needs of the emergency incident/event.
Muster Point	Vista Ridge

COVID-19	Due to COVID-19, any registrant on the Vulnerable Persons Registry (VPR) Program will: • Reduce bus, aircraft and boat capacities to adhere to physical distancing (6 ft.) recommendations (as applicable), • Bus drivers, pilots, boat drivers and evacuees will wear masks (unless exempt), and • Be directly transported to their destination (Accommodation Facility) skipping the Registration Centre to reduce their risk of infection and spread of the virus.
-----------------	--

Evacuation Plan Procedures

Evacuation Plan (Bus-assisted)

The following evacuation plan is a bus-assisted evacuation designed for the community and not specific buildings (i.e. schools, arena's, etc.) and it is based on:

Total: Evacuation of approx. 40 residents requiring evacuation assistance.

COVID-19

Due to COVID-19, bus-assisted evacuation will:

- Reduce bus capacities to adhere to physical distancing (6 ft.) recommendations (as applicable),
- Bus drivers and evacuees will wear masks (unless exempt),
- When buses arrive at Registration Centre/muster point evacuees must remain on buses, and
- Emergency Social Services (ESS) volunteers and/or staff will register evacuees through online or drive-thru registration to not create mass gathering at Registration Centre and reduce the risk of infection and spread of the virus.

Evacuation Time to Muster Point

Estimated evacuation times are as follows:

- Create a traffic control plan, coordinate resources and stage resources - **2 hours.**
- Evacuate to muster point- **3 to 4 hours.**
- Approx. total evacuation time- **5 to 6 hours.**

COVID-19

Due to COVID-19 safety precautions, approximate evacuation times might increase.

Muster Point

Vista Ridge

Evacuation Routes

*Note: All roads within the subdivision can be used as evacuation routes within the community. AB-69 is the main evacuation route out of the area.
(see map)

PRIMARY:

Commence on Spruce Valley Drive to AB-69. Travel on AB-69 to AB-63.

Emergency Social Services (ESS)

Accommodation Facilities	Establishment and locations of Accommodation Facilities will depend on the complexities of the disaster event and the location of the affected community. Emergency Social Services (ESS), has identified and made arrangements with several facilities that are suitable for use depending on the nature and location of the disaster event. See “Emergency Social Services Plan” and “Pet Care Plan” for a detailed overview of ESS operating procedures.
